

## **Introduction to ISO 14001**

ISO 14001 is the international standard for environmental management systems and is used by organisations all over the world as a framework to protect the physical environment around us and as a driver for business improvement. It defines the requirements for an effective environmental management system and is applicable to any organisation regardless of size or industry sector.

This one-day Introduction to ISO 14001 training course will provide you with a thorough overview of environmental management systems – their purpose and benefits, and the structure and requirements of ISO 14001:2015. You will learn to identify what elements of an organisation’s activities, products or services can interact with the environment (environmental aspects) and the positive or negative changes these bring to the environment (environmental impacts), and how these feature within an internal audit.

### **Key Topics**

- Much of the day will explore ISO 14001:2015 in detail, its structure, requirements (clauses), Annex A and the guidance within ISO 14004. In addition, we will look at:
- Reviewing the purpose and benefits of environmental management systems
- Annex SL, the high-level structure of ISO 14001:2015 and other management system standards
- The role of internal audits within the EMS and Management Review
- An introduction to the interrelationship of organisation Context, Interested Parties, Compliance Obligations, Environmental Aspects, Life Cycle Perspective, Risks & Opportunities, and discussion of their importance for the auditor
- Environmental aspects and impacts
- The framework of UK environmental law

### **Outcomes**

On completion of this one-day Introduction to ISO 14001 training course you will have gained a thorough understanding of the purpose, structure, and requirements of this international environmental management systems standard, ISO 14001:2015.

### **Course Duration**

1 Day

### **Course Cost**

£475 for up to 12 Delegates
